

Did you know... Retirement dates are set on all support platforms? These often go unnoticed and lead to poor system performance.

At School ICT, we understand that protecting your school's data is a number one priority and critical to your schools success.

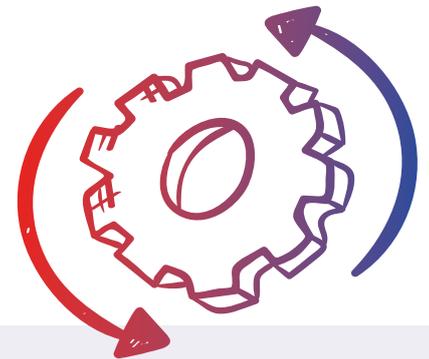

To ensure your systems are running as quickly and efficiently as possible our specialist team of accredited technical experts provide a complete and cost effective SIMS server migration, transferring your data safely and securely, minimising downtime and ensuring continuity of the smooth running of your school.

What's Included?

- A full MIS server migration includes migration of the SIMS database, Solus 3 and Discover and all services will be migrated to the latest supported version of Microsoft SQL server.
- You can rest assured that our team of experienced SIMS and Technical experts will provide you with Best in class reliable support – ensuring your data is protected at all times.

For the latest SIMS Technical Roadmap click below (see p.6 for key dates): -
