

SIMS ID

SIMS

MAKES RUNNING YOUR
CLOUD SERVICES EFFORTLESS

- A single sign-on solution for schools and school groups
- Easy-to-manage access and permissions for staff and pupils across single and multiple sites
- Reduce administration with self-service password management
- Enables Google and Microsoft Office 365 integration

A SINGLE SIGN-ON SOLUTION FOR SCHOOLS AND SCHOOL GROUPS

SIMS ID makes running cloud services effortless for schools, MATs and support teams responsible for administering multiple school sites. School staff and pupils benefit from having a single login for multiple local and cloud-based applications, which they can access through an intuitive user-friendly launchpad. The ability to manage user permissions centrally offers reassurance that access to school systems is secure and saves valuable time for technical staff.

WHY CHOOSE SIMS ID?

BENEFIT FROM **SIMS ID** FREE OF CHARGE

If you use a SIMS application, you are likely to already be using SIMS ID. The standard version of SIMS ID is available to schools completely free of charge and includes all of the features listed below. To find out how to ensure you are accessing all the benefits, visit www.capita-sims.co.uk/sims-id.

A SINGLE USERNAME AND PASSWORD FOR YOUR SERVICES

SIMS ID aims to make life easier for staff and pupils by enabling them to access their assigned services through an intuitive interface. They will only need to remember one username and password and there is no need to re-enter passwords once logged into their device. In addition, once set-up, users can manage and reset their own passwords at the click of a button.

SIMPLE AND SECURE MANAGEMENT OF USER IDENTITIES

Data is automatically pulled from SIMS to create your SIMS IDs. It automatically provisions users and groups into integrated cloud services including Microsoft Office 365 and Google. User identities across local and online services can be centrally managed from a single admin portal, allowing you to enforce security policies across single or multiple schools and retain a clear audit trail. SIMS ID with Active Directory Account Management minimises the effort of running your local Active Directory, through automatic updates to your local users and groups.

INTEGRATED WITH MICROSOFT OFFICE 365 AND GOOGLE

You can create and manage Microsoft Office 365 and Google accounts through SIMS ID. In addition to this:

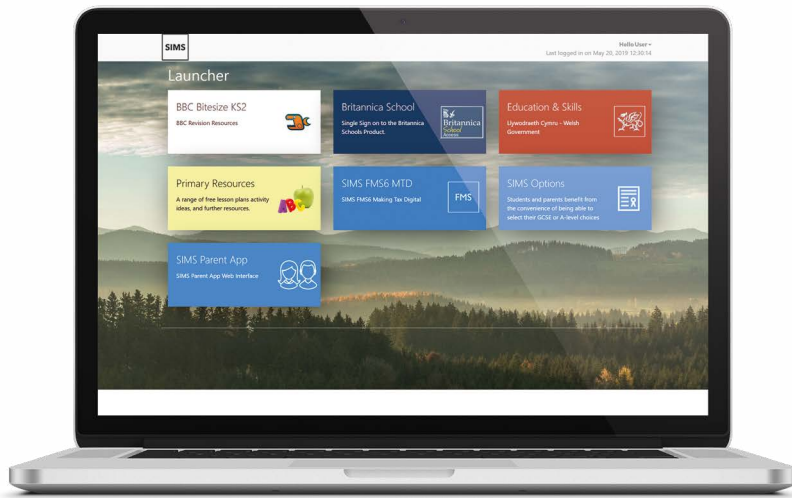

- Automatically provision Microsoft School Data Sync information to enable Microsoft Teams
- See your SIMS timetables in your Microsoft Office 365 and Google calendars
- Microsoft OneNote writes assessment straight back into SIMS Assessment Manager
- Google Classroom Marksheet writes assessment data back to SIMS Assessment Manager

UPGRADE TO **SIMS ID** WITH ACTIVE DIRECTORY AND ACCOUNT MANAGEMENT

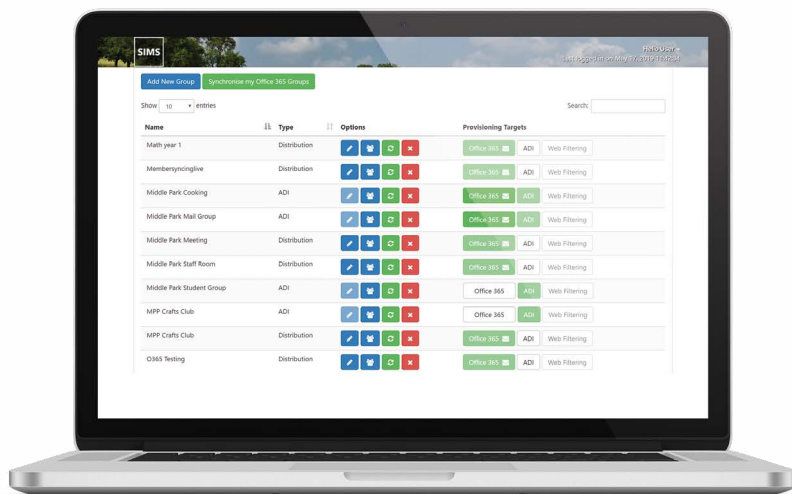

To access local networks and local SIMS through SIMS ID single sign-on, you will need to upgrade to our **SIMS ID with Active Directory and Account Management** package. This includes Local Active Directory account provisioning, single sign-on from desktop to cloud and local network access.

TAKE A LOOK...

User-friendly launchpad

Users can access all of their assigned services through this user friendly launchpad, with no need to keep re-entering passwords.

Intuitive admin portal

As an administrator, you can automate SIMS ID provisioning and manage permissions and access through a comprehensive and intuitive admin portal.. If a user leaves, all access can be revoked simultaneously, ensuring your services remain secure.

YOUR QUESTIONS ANSWERED

Is SIMS ID hosted or installed?

SIMS ID is a hosted and fully managed solution. The advantage of this for schools, multi-academy trusts and local authorities is that it reduces the costs of managing and delivering a completely integrated ICT solution.

Is SIMS ID secure?

Yes, it contains a number of security features which allow you to grant appropriate access to relevant members of the organisation, ensuring only authorised personnel are able to make changes to a user or group.

Can I integrate with local resources and applications?

Yes. To do this, you will need our SIMS ID with Active Directory and Account Management package. This can be used to generate logins for any locally based services that work with Active Directory.

Can our school still use SIMS ID if we run SIMS locally?

Yes, you will still be able to use SIMS ID if you run SIMS locally, but you can only use single sign-on to access SIMS and FMS if you have the versions of those products that are hosted by us.

WHO BENEFITS AND HOW?

STAFF AND PUPILS:

- Customisable launchpad providing simplified, consistent access to online services from any device
- A single username and password for all services connected to SIMS ID
- Users can securely reset and manage their own passwords
- No need to re-enter passwords once you've logged into your network device
- Your SIMS timetable visible in your Google and Office365 calendar.

IT MANAGERS:

- Simplified management of user identities across local and online services
- Automatically pulls data from SIMS to create SIMS IDs in your chosen format
- Automatically provisions users and groups into integrated cloud services including Office 365 or Google
- Minimises the effort of running your local Active Directory with automatic updates to your local users and groups
- Enforces centrally administered security policies, including disabling all services when a user leaves your service
- Provides clear audit trails to assist you in maintaining the security of your systems and data.

SENIOR LEADERS:

- Reassurance that the right people have the right level of access to the right systems across single or multiple sites
- Enforces centrally administered security policies to ensure access is protected
- Free up technical resources from repetitive admin tasks, to focus on your bigger priorities
