

The future of FMS is in the cloud: Let's get your school ready

The next generation of FMS is coming – and it's built for the cloud. Launching in early 2026, our cloud-native FMS is designed to support the challenges schools face every day.

From protecting sensitive financial and school data to giving staff secure access to systems anytime, anywhere – this is the future of school finance, and we want to help you get ready.

Join one of our upcoming webinars to learn what's changing, how to prepare, and how your school can be first in line when the next generation of FMS becomes available. This is included in your current contract (Finance Package) at no extra cost.

Benefits of moving FMS to the cloud

We understand the pressures school finance teams face:

- You're handling sensitive data that must be protected from growing cyber threats
- School days are busy, and staff aren't always on-site to access finance systems
- Managing processes across multi-site locations creates unnecessary admin

The next generation of FMS delivers:

- Secure and resilient access to data anytime, anywhere
- Best in class security and protection of your financial and school information
- A simpler experience designed to ease your workload

Why attend this webinar?

Get your school ready early and minimise disruption during the transition

See how our 2-step process makes moving to the cloud straightforward

Unlock new reporting tools and be among the first to access the next-generation of FMS
